## DASH2 | System

### Mobile Device Charging System

The CarComm DASH2 | System is the solution to charge and mount your smartphone in your vehicle, consisting out of a DASH2 | Dock and a device specific DASH2 | Cradle.

The system is easy to install and blends in perfectly with your car's interior.

#### Swap smartphones

The unique feature of the DASH2 | System is that you can easily switch your smartphone for another model without installing a completely new cradle system. You only need a DASH2 | Cradle that is compatible with your new smartphone, insert the cradle in the DASH2 | Dock and the system is ready to go.

#### Cars and Trucks

The DASH2 | System can be connected to a 12Volt or 24Volt power input, which makes it compatible with cars, vans & trucks. It will keep your device charged and ready for use in- and outside your vehicle.

#### External Antenna Connection

The DASH2 | System has an external antenna connection for a cellular antenna to optimize signal reception and decrease signal interference.

#### Features

- Device specific DASH2 | Cradle for a perfect fit
- Easily switch between devices using the DASH2 | Cradles
- Integrated Antenna Coupler
- Compatible with 12Volt upto 24Volt
- CE Certified
- Professional integration of your smartphone in your vehicle
- Designed & assembled in the Netherlands

## DASH2 | Dock

### Docking Station for the DASH2 | Cradle

The DASH2 | Dock is an universal docking station for the device specific DASH2 | Cradle.

#### Consumers and Professionals

There are various models of DASH2 | Docks available with different power- and external antenna connections, tailored to the consumer, professional and automotive market. OEM requests are welcome.

#### PoGo System Connector

The DASH2 | Dock uses a gold plated PoGo connector. This connector is a robust and reliable way to ensure an optimal connection between the DASH2 | Dock and DASH2 | Cradle.

#### Locking Mechanism

To keep the device specific DASH2 | Cradle in place, the DASH2 | Dock is equipped with custom fixtures. These fixtures lock the cradle in place so it can charge your smartphone but is still easy to remove.

The DASH2 | Dock can be installed on the dashboard or any other flat surface. With the included rotating swivel, you can easily position your smartphone in your preferred viewing angle.

#### PoGo System Connector

Gold plated for an optimal connection

#### Locking Mechanism

Plug & Play, easily insert the DASH2 | Cradle and secure it in place

#### Power & Antenna Connection

Can be routed backwards, out of sight, for a clean installation

## DASH2 | Cradle

### Device Specific Smartphone Cradle

The DASH2 | Cradle is a device specific smartphone cradle, that charges your smartphone and securely holds it in place while you are on the move.

#### Integrated Charging System

The automotive grade charger is integrated inside the DASH2 | Cradle and can deliver up to 3A to charge your smartphone.

#### Device Specific Cradle

The smartphone is inserted vertically into device specific DASH2 | Cradle. To ensure a secure connection between the DASH2 | Cradle and the DASH2 | Dock, the cradle is inserted horizontally into the dock. This way you'll never accidentally remove the DASH2 | Cradle from the dock when you remove your smartphone.

#### Integrated Antenna Coupler

The cradle has an integrated Antenna Coupler that transfers the cellular signal from outside the vehicle to your smartphone to optimize reception.

#### Antenna Coupler

To optimize reception and decrease interference

#### Device Specific Cradle

Smartphone specific parts for a perfect fit

#### High Quality Connector

Perfect fit and connection with your Smartphone

#### PoGo System Connector

Robust and reliable connection between DASH2 | Cradle and DASH2 | Dock

#### Automotive Grade Charger

Compatible with Cars & Trucks, integrated inside the cradle
